## Hello, Earth!

View of Earth taken from Danuri, Korea's first lunar orbiter, on Dec. 28 after successfully entering the targeted orbit around the moon last month. According to the Korea Aerospace Research Institute, the orbiter took the picture from 124 kilometers above the moon.

## 지구야, 안녕?

지난달 목표 궤도에 성공적으로 진입한 한국 최초의 달 궤도선 다누리에서 본 지구의 모습. 한국항공우주 연구원에 따르면 이 궤도선은 달 상공 124km에서 이 사진을 찍었다.
